Canadian Forces Contracted Flying Training & Support Contract (CFTS)

Allied Wings is a consortium led by Kelowna Flightcraft Ltd that includes Canadian Helicopters Ltd, Canadian Base Operators, and Atlantis Systems International Inc. We provide services to the Government of Canada under the Contracted Flying Training and Support Services (CFTS) contract.

Allied Wings provides modern flight training to the Canadian Forces in primary, rotary and multi-engine training. This training involves advanced methodologies of instruction, state of the art courseware and flight simulation; all designed to provide the best training possible for aircrew.

To accommodate this undertaking, The Southport infrastructure has been rebuilt to include 2 new hangars, and a state-of-the-art 7,432 square-meter training complex.

Allied Wings offers primary flying training, multi-engine training and rotary flight training with 36 different courses in those streams. Allied Wings provides ground school instructors, courseware, flight services and the aircraft, while the Canadian Forces provides flying instructors for the multi-engine and rotary wing programs. We also provide new aircraft and simulators, meteorological services, air traffic control, emergency response, and airfield aviation services. We are also responsible for plane and simulator maintenance.

Allied Wings provides 32 aircraft, including Grob G120A aircraft that are used for primary flying training, Raytheon King Air C-90B for multi-engine flying training, Bell 206B III Jet Rangers, and Bell 412 helicopters for multi engine helicopter flying training.

The training regime will also emphasize simulation in three new high-fidelity simulators: a Bell 412 Level D full-flight simulator, a Bell 412 Cockpit Procedures Trainer, a C90B King Air Level D full-flight simulator, a C90B King Air Integrated Procedures Trainer and a Grob G120A Cockpit Procedures Trainer. Simulation will also be provided using a suite of desktop trainers.

Allied Wings also provides a student residence and cafeteria facilities. There are typically 50-100 students on site and nearly 200 employees directly or indirectly associated with the project.

Quality Assurance Manager

The Allied Wings Team is a strategic partnership of four industry leaders in integrated flying training solutions and advanced simulation technologies. Operating out of Southport (near Portage la Prairie), Manitoba, the team provides full-service training support in fixed and rotary wing operations, facilities and support services, and ground-based training systems for the Canadian Air Force (DND).

The QA Manager coordinates with the Site Manager to ensure the Quality Management System (QMS) maintains Allied Wings compliance with contractual requirements and continually improves standards and performance in pilot training and support. The QA Manager will be a trained and certified ISO 9001 Auditor

Job Requirements:

- Ensure managers and supervisors understand the purpose and intention of the QMS and how it works.
- Monitor, measure and analyze quality processes necessary to achieve CFTS Project goals.
- Ensure the availability of resources and information necessary to support the operation and monitoring of quality processes
- Implement actions necessary to achieve project outcome and continually improve the required quality processes
- Identify additional processes needed for the QMS and their application throughout the program
- Determine the sequence and interaction of additional quality process required for the program
- Evaluate criteria and methods needed to ensure that both the operations and control of quality processes are effective and contribute towards improvement of the program

Qualifications:

- ISO 9001 Auditor Certification
- 5 years experience with ISO 9001 standards
- Strong interpersonal skills
- Outstanding technical writing and record keeping skills
- Strong organizational skills
- Aviation experience would be an asset

Security clearance through DND is a pre-requisite. This will require a detailed personal history application along with fingerprinting.

To support your career we offer a competitive salary, paid vacation, a matching pension plan, and a benefit plan that includes: Medical, extended medical, dental (including orthodontics for children), life and accident insurance, paid sick time, short and long term disability and an Employee and Family Assistance Program. These benefits are extended to your spouse and dependant children.

Allied Wings is an equal opportunity employer!
